

The 6th Scientific Conference EpiMilitaris 2018
Medical aspects of the use of Weapons of Mass Destruction factors challenge for the
uniformed services.

April 16-18, 2018 r. Hotel Ryn Castle in Ryn

Ladies and Gentlemen,

this year Conference EpiMilitaris 2018 organizers:

1. The Epidemiological Response Centre of the Polish Armed Forces,
2. Department of Disaster and Emergency Medicine of The Jagiellonian University - Medical College,
3. Optoelectronic Institute of The Military University of Technology,
4. Military Health Institute of Armed Forces of the Czech Republic.
5. The Association of Defense Communities Movement,

would like to invite You to take part in the sixth edition of the EpiMilitaris Conference cycle, which will this time address the challenge for the uniformed medical services in the face of situation with the presence of weapon of mass destruction agents.

This year's Agenda will include the following topics:

1. CBRN threat identification. Threats monitoring, environmental diagnosis, medical intelligence.
2. Identification of CBRN factors. Procedures, techniques, new technologies.
3. Proceedings in the contaminated area. Forensic, triage, environmental aspects. Medical rescue in the area of contamination.
4. Medical evacuation from the contaminated area by CBRN agents.
5. Hospital as a stage for dealing with a contaminated patient.
6. Prevention of CBRN weapons use.
7. Managing a crisis situation after a CBRN incident.
8. Needs and gaps in the CBRN Med

The Conference is to provide a platform to share and expand knowledge on activities which are implemented to facilitate effective delivery of rescue operations by the medical uniformed services in relation to the occurrence of CBRN agents. Therefore the subject area relates to a wide range of activities undertaken throughout the process of responding to the threat: preparation and prevention, activities during the event but also after its occurrence.

Conference Agenda includes also workshop part with practical rescue actions taken after incidents with CBRN agents.

We have sent invitations to take part in the Conference to representatives of various national and international institutions which are involved in the area of CBRN Med, both in terms of theoretical and practical aspects.

The participants will receive credit points, and scientific reports will be published in Bulletin of the Military University of Technology, scientific journal indexed in many scientific databases.

Therefore I would like to invite You to 'RYN CASTLE' on **16-18 April 2018**, where there will be an opportunity to listen to speeches and share experience with Polish and international leading experts specialising in CBRN medicine. I am convinced that discussions will be interesting and inspiring and new contacts will benefit in the future.

I would also like to invite you to visit our website at www.cresz.wp.mil.pl, where we will share up-to-date information.

On behalf of Scientific and Organizing Committee
